

a global vision for software testing

PRESS RELEASE

Company News: TCL has become accredited to deliver all courses for ISEB certification in Software Testing

TCL have received confirmation of their company accreditation for the final part of the ISEB Software Testing certifications. To achieve this all TCL tutors have demonstrated the necessary levels of teaching and practical experience required, as well as having passed the qualification themselves.

“I'm really pleased that we can now offer the full range of ISEB Software Testing courses. This allows us to provide testers with the learning and certification to take them right through their careers, whether they are technicians or managers.”

Richard Morgan
Training Manager, Transition Consulting Limited

TCL provides training in: risk-based testing, benefits-based testing, static testing, exploratory testing, performance testing basics, aligning test strategies to corporate goals and their SMaRT testing methodology (covering test strategy, test planning, test scripting, test execution and test closure).

ISEB/ISTQB Foundation Certificate in Software Testing

The key objective of this course is to provide the course delegate with a basic knowledge and understanding of software testing.

ISEB Intermediate Certificate in Software Testing

The course covers five main topics: fundamentals of testing, reviews, risk, test management and test analysis. This is the gateway to practitioner certifications.

ISEB Practitioner Certificate in Test Analysis

This course concentrates on developing the skills to analyse requirements, design test cases and create test scripts.

ISEB Practitioner Certificate in Test Management

This course addresses the skills, tools and techniques required in order to manage the test effort successfully.
