

a global vision for software testing

PRESS RELEASE

Zappers highlights 76 defects in four Top US careers websites

London, UK, October 2010 - Following the recent success of the uTest ['Clash of the Career Sites'](#) competition the Zappers Community went truly global testing four of the top US careers websites; Monster, CareerBuilder, SimplyHired and Indeed.

The meet up co-hosted and sponsored by [TCL](#) and [uTest UK](#) allowed the Zappers Community to showcase their global software testing capabilities, bringing together testers from in and around London to test the top US sites. Teams were formed from a combination of UCL students, professional testers and amateurs keen to learn more about the exciting world of testing. The evening saw testing knowledge shared and imaginative testing methods used as each team competed for the £200 cash prize.

More and more companies are experiencing the benefits of live testing at Zappers events. They witness first hand how uTest UK crowdsourcing can get their application to market much quicker, launch higher quality products and control the cost of testing without long-term contracts.

Zappers believe in learning from each other and sharing testing knowledge to raise the standard of testing throughout the UK and internationally. More importantly they believe in having a good time doing this and so all events include free food and drinks and are totally free to enter.

To host an event, attend or have your application featured contact Lisa Ray on 0845 869 6070, lisa.ray@tcl-global.com, or sign up at www.zappers-community.com.

About TCL & uTest

TCL is a UK partner for uTest, the world's largest marketplace for testing web sites as well as desktop, mobile and gaming software applications. uTest utilises a crowdsourcing model for providing testing services in an efficient and cost-effective manner. uTest's worldwide community of software testers (30,000+) provide comprehensive testing coverage across environments (OS, web browser, anti-virus, firewall, mobile handset, etc.) and demographics (age, sex, geographic location, etc.).
